

The National Breast Cancer Coalition's
2022 Advocate Leadership Summit

BE BOLD: Unite to End Breast Cancer

The Summit: Saturday, April 30 – Monday, May 2
Lobby Day Briefing and Preparation: Monday, May 2
Lobby Day: Tuesday, May 3

OUR MISSION is to end breast cancer through the power of action and advocacy.

Founded in 1991, the National Breast Cancer Coalition (NBCC) is a collaboration of activists, survivors, researchers, policymakers, grassroots groups, and national organizations that have come together as disruptive innovators for social change.

We link hundreds of organizations and tens of thousands of individuals from across the country into a dynamic, diverse coalition that gives breast cancer a meaningful voice in Washington, D.C., and state capitals; in laboratories and health care institutions; and in local communities everywhere.

BREAST CANCER FACTS & FIGURES

INCIDENCE

Excluding basal cell and squamous cell skin cancers, breast cancer is the most commonly diagnosed cancer among women in the U.S. In 2021, there will be an estimated **281,550*** new cases of invasive breast cancer diagnosed in women; **2,650*** cases diagnosed in men and an additional **49,290** cases of ductal carcinoma in situ (DCIS)** diagnosis in women. (ACS, 2021)

Lifetime Risk

In the United States, a woman's lifetime risk of being diagnosed with invasive breast cancer has increased since 1975.

(ACS, 2021; DeSantis et al., 2021)

2021 | **1 in 8**
12.8%

1975 | **1 in 11**
9.09%

Incidence By Age

Older women are much more likely to get invasive breast cancer than younger women. From 2013-2017, the median age of a breast cancer diagnosis was 62 years of age. (NCI, 2021)

*These statistics do not account for the effect of the COVID-19 pandemic.

**Annual incidence counts of lobular carcinoma in situ are no longer measured following its removal from the 2017 edition of the AJCC breast cancer staging system.

MORTALITY

Progress in breast cancer mortality reduction has slowed in recent years. The mortality rate was decreasing by about 1.9% annually between 1998 and 2013. Annual declines have slowed to 1.0% between 2013 and 2018. (ACS, 2021)

While the breast cancer mortality rate has declined the number of women and men who die each year is rising and will continue to rise as the aging population grows.

Mortality By Age

From 2014-2018, the median age at death from breast cancer was 69 years of age. (NCI, 2021)

The National Breast Cancer Coalition's

2022 Advocate Leadership Summit

JOIN with fellow survivors, advocates, and members of the breast cancer community, who are lending their voice and transforming breast cancer research and public policy, and ensuring quality healthcare for all.

At the 2022 Advocate Leadership Summit, exciting plenaries and skill-building workshops will focus on the most critical areas of breast cancer research, science, and public policy. Attendees will have opportunities to network with other breast cancer survivors and advocates, and connect with leading researchers in the field.

Our annual Lobby Day follows the Summit on **Tuesday, May 3**, when advocates will meet with their elected officials under the leadership of NBCC about our 2022 legislative and public policy agenda. The Lobby Day Briefing and preparation will take place on **Monday, May 2**.

Here are some **TIPS** to help you with your fundraising:

- Start asking for donations early.
- Set a goal and tell people what it is.
- Let everyone know that you're attending the Leadership Summit to become an advocate because you want to help end breast cancer.
- Research your company's matching gift program. You could double the money you raise!
- Remember to thank every individual who helps you reach your goal. Let them know you appreciate them and that they're helping make a difference. Provide updates — let people know how much you've raised and how close you are to reaching your goal.
- After the Summit e-mail your supporters with some facts from the Summit.
