Dear Colleague:

In 2022, there will be an estimated 287,850 new cases of invasive breast cancer diagnosed in women, 2,710 cases diagnosed in men, and an additional 51,400 cases of ductal carcinoma in situ (DCIS) diagnosed in women. Breast cancer is the second leading cause of cancer death for women in the United States after lung cancer. It is estimated that this year, 43,250 women and 530 men will die of breast cancer. Female active-duty Service members have a 20-40% higher incidence rate of breast cancer than the general public. The incident rate of breast cancer for active-duty women is seven times higher than the average incident rate of fifteen other cancer types across all Service Members.

While some progress has been made to end this disease, much work remains to be done. As a nation, we must continue to show a commitment to changing these statistics. The Department of Defense Peer Reviewed Breast Cancer Research Program (DOD BCRP) is a critical tool in this effort.

Since its inception, the DOD BCRP has established itself as an innovative, competitive, and accountable medical research program. The groundbreaking science performed through the program is changing the face of biomedical research. The BCRP is streamlined and efficient.

A recent GAO report on the program, found that Program “obligated nearly 100 percent of its CDMRP appropriations, prioritizes and assesses biomedical research investments through effective program and project management, and coordinates with NIH and VA for research program planning and project selection and leverages shared data to identify potential overlap.”

The program can quickly respond to current scientific advances and fill gaps by focusing on research that is traditionally underfunded. It involves consumer advocates in all aspects of the process - both the peer review and programmatic review levels - which allows for funding decisions based on the concerns and needs of patients as well as the medical community.

Last year, nearly 200 US Representatives supported our bipartisan effort to continue funding for this worthy program. This year, we again ask that you sign the letter to the Defense Appropriations Subcommittee in support robust funding for FY2023.

Please contact Keven Gannon (Kevin.Gannon@mail.house.gov) in Congressman Garbarino’s office or Artin.Haghshenas@mail.house.gov in Congresswoman Sherrill’s office with any questions.

Sincerely,

Andrew R. Garbarino
