The National Breast Cancer Coalition is a collaboration of activists, survivors, researchers, grassroots groups, and national organizations that have come together as disruptive innovators for social change. NBCC links hundreds of organizations and tens of thousands of individuals from across the country into a dynamic, diverse coalition that gives breast cancer a meaningful voice in Washington, DC, and state capitals, in laboratories and health care institutions, and in local communities everywhere. NBCC increases funding and leads efforts for innovative breast cancer research; monitors how research funds are spent; expands access to quality health care for all; and ensures that trained advocates influence all decision making in breast cancer.
